

AMERICAN NUCLEAR SOCIETY & HEALTH PHYSICS SOCIETY
JOINT TOPICAL – SEPTEMBER 23 – 26, 2018
TRI-CITIES, WASHINGTON

Sponsoring and Exhibit Opportunities

Why is This Important?

This conference will explore the Linear No-Threshold approach to human protection from ionizing radiation. Substantial research calls into question the validity of this policy. If the current inaccurately conservative model and its unsubstantiated implementation can be replaced with a more realistic approach there is potential for remarkably positive economic, social, medical, ethical, engineering, and public-perception impacts. You will receive substantial recognition for your participation – see details below.

Why are Sponsorships and Exhibitors Important?

1. Registration fees do NOT fully cover the cost of the meeting.
2. It is vital that prominent national and international authorities are participants.
3. Your contribution will help to ensure the success of this very important and timely meeting.
4. This meeting and this topic are extremely important for public acceptance of nuclear technology.
5. It is an opportunity for your organization to increase your visibility to people who matter in this field.
